Fax: (520) 562-5196
EHSHelpDesk@gric.nsn.us

The commissary is a base of operations for all mobile food units, pushcarts and some food peddler operations. Each vehicle is required to operate from an approved commissary and report daily for all supplies, cleaning and servicing operations. Each commissary is required to be constructed and operated in compliance with the requirements of the Gila River Indian Community's adopted Food Code.

Depending on the needs of the vehicle, commissaries may have different services available. In general, commissaries are used to carry out the following services:

- Fresh water supply
- Grey water disposal
- Warewashing facilities
- Food preparation
- Garbage disposal
- Food storage
- Chemical storage
- Facilities for cleaning and storage of vending machines.

In order to obtain a permit from Environmental Health Services, a signed commissary agreement is required for each unit at the time of initial permitting and at permit renewal. Be aware that each commissary agreement will be verified to ensure the facility is able to provide your mobile food operation with the services needed.
